PROFESSIONAL SUMMARY

- Lead Guidewire Portal Developer with 2+ years of experience building scalable digital portals using Jutro, React JS, and Guidewire EDGE APIs.
- Strong leadership in driving technical decisions, mentoring teams, and ensuring code quality, performance, and scalability.

EXPERIENCE

Senior Associate

Aug 2025 – Present

PwC

Hyderabad, Telangana

- Leading end-to-end design and development of Guidewire Digital Portals using Jutro and React JS for enterprise insurance clients.
- Owned end-to-end delivery of portal features from design to production deployment in Agile environment.
- Resolved critical production performance bottlenecks, reducing portal load time by 35% and improving user experience.
- Transformed a non-responsive portal into a fully mobile-friendly application by refactoring components, achieving 100% mobile compatibility.
- Implemented key features including side-by-side quoting and custom data masking aligned with business and compliance requirements.
- Leveraged GenAI tools to accelerate development and improve code quality, enhancing delivery productivity.
- Led code reviews and mentored developers, improving code quality and team productivity.

Software Engineer

June 2021 – July 2025

Valuemomentum

Hyderabad, Telangana

- Developed metadata-driven Guidewire Jutro UI for Workers Compensation and Commercial Auto insurance products.
- Integrated Guidewire EDGE APIs enabling dynamic, real-time policy data rendering within custom portal components.
- Designed and developed reusable UI components, reducing development effort by 40% and production defects by 70%.
- Optimized portal performance and load times by improving component rendering and API handling strategies.
- Identified and resolved critical UI issues, ensuring stable sprint releases and improved application reliability.
- Collaborated with business analysts and stakeholders to gather requirements and ensure accurate implementation.
- Performed peer code reviews and enforced coding standards aligned with React and Guidewire best practices.

SKILLS

Frontend Technologies: React JS, JavaScript (ES6+), HTML5, SCSS/CSS3

Guidewire Expertise: Jutro Framework, EDGE APIs, PolicyCenter Integration, Producer Engage, Customer Engage

Architecture & Practices: Component-Based Architecture, Performance Optimization, Responsive Design, Code Reviews

Tools & Platforms: Git, GitHub, BitBucket, Storybook, Figma, Agile/Scrum

Gen AI Tools: ChatGPT, GitHub Copilot

PROJECTS

ToolMate | <https://toolmate.co.in>

- Developed a centralized platform listing productivity and developer tools using Next.js (Server-Side Rendering) and Tailwind CSS.
- Built responsive and performant UI components ensuring seamless user experience across devices.
- Optimized page load performance using SSR, improving SEO and initial render speed.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

- Gained foundational knowledge of cloud concepts, Azure services, security, and pricing models applicable to scalable application development.
